History of sewerage System and it's development

- I. Development of sewerage system
- II. Applying ready made treatment System
- III. Due to Population Density
- IV. Increasing Water Table
- V. Public Toilet

I. Development of sewerage system

II . Applying ready made treatment System

2013	January	YCDC	10m ³	USD 10,000
2014	March	Phaung Daw Oo Pagoda	6m ³	USD 7,500
2014	May	MCDC	10m ³	USD 10,000
2016	December	Information Center	1m ³ (5 sets)	USD 12,450
2017	January	Nyaung Shwe (Night Market)	3.6m ³	USD 6,400
			Total	USD 46,350

2017	September	Shwe Dagon Pagoda (East, West, South, North)	4m ³	USD 100,000
			Total	USD 100,000

III . Due to Population Density

New Yangon

IV . Increasing Water Table

V . Public Toilet

Information of Current Wastewater Treatment Plant

- About Wastewater Treatment Plant in Yangon , Just Now.
- To reduce BOD loading and other problem from Vacuum Truck
- How to use sludge?
- Micro-organism (Aerobic & Anaerobic Bacteria)

Disposal of sewerage into the river without treatment before establishment of Sewage Treatment Plant

Yangon City Development Committee started to construct wastewater treatment in June 2003 by own human resources with the guidance of State Government to protect the environment.

Location of Sewage Treatment Plant

Sewerage System

Estimated population with sewer (conventional sewer system) is 300,000 people. Main content of system are

- 1) Air Compressor Station
- 2) Pneumatic Ejectors
- 3) Air Pipeline
- 4) Gravity sewer pipeline
- 5) Wastewater Treatment Plant

-  Wastewater treatment plant
-  Air compressor station
-  Total length of sewer pipe line - (10.75) km (12" CI to 36" CI Pipe)
-  Sewage ejectors - (35) Nos
-  Manholes - 2114 Nos

Equalization Tank & Vacuum Truck

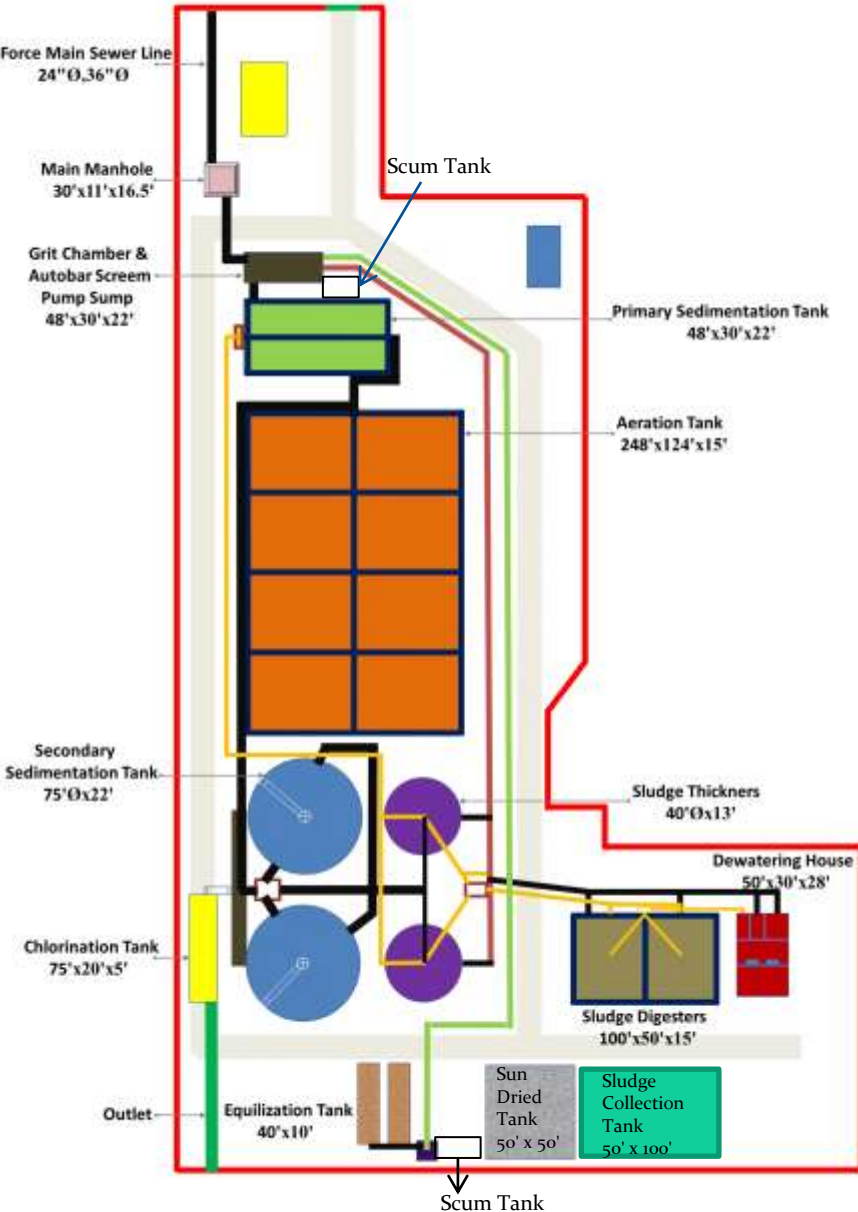

- Year of Establishment** - 12th April 2003
- Year of Completion** - 17th January 2005
- Year of Opening ceremony** - 22nd December 2006
- Volume of Daily Treatable sewage** - 3.25MGD
- Developer** - Myanmar Engineers of Yangon City Development Committee
- Cost of Project** - US\$ 0.96 Millions (Myanmar Kyat -2065.7 Millions)
- Areas of Plant** – 5.56 Acres

Vacuum Truck

Layout plan of Treatment plant

Establishment of Sewage Treatment Plant

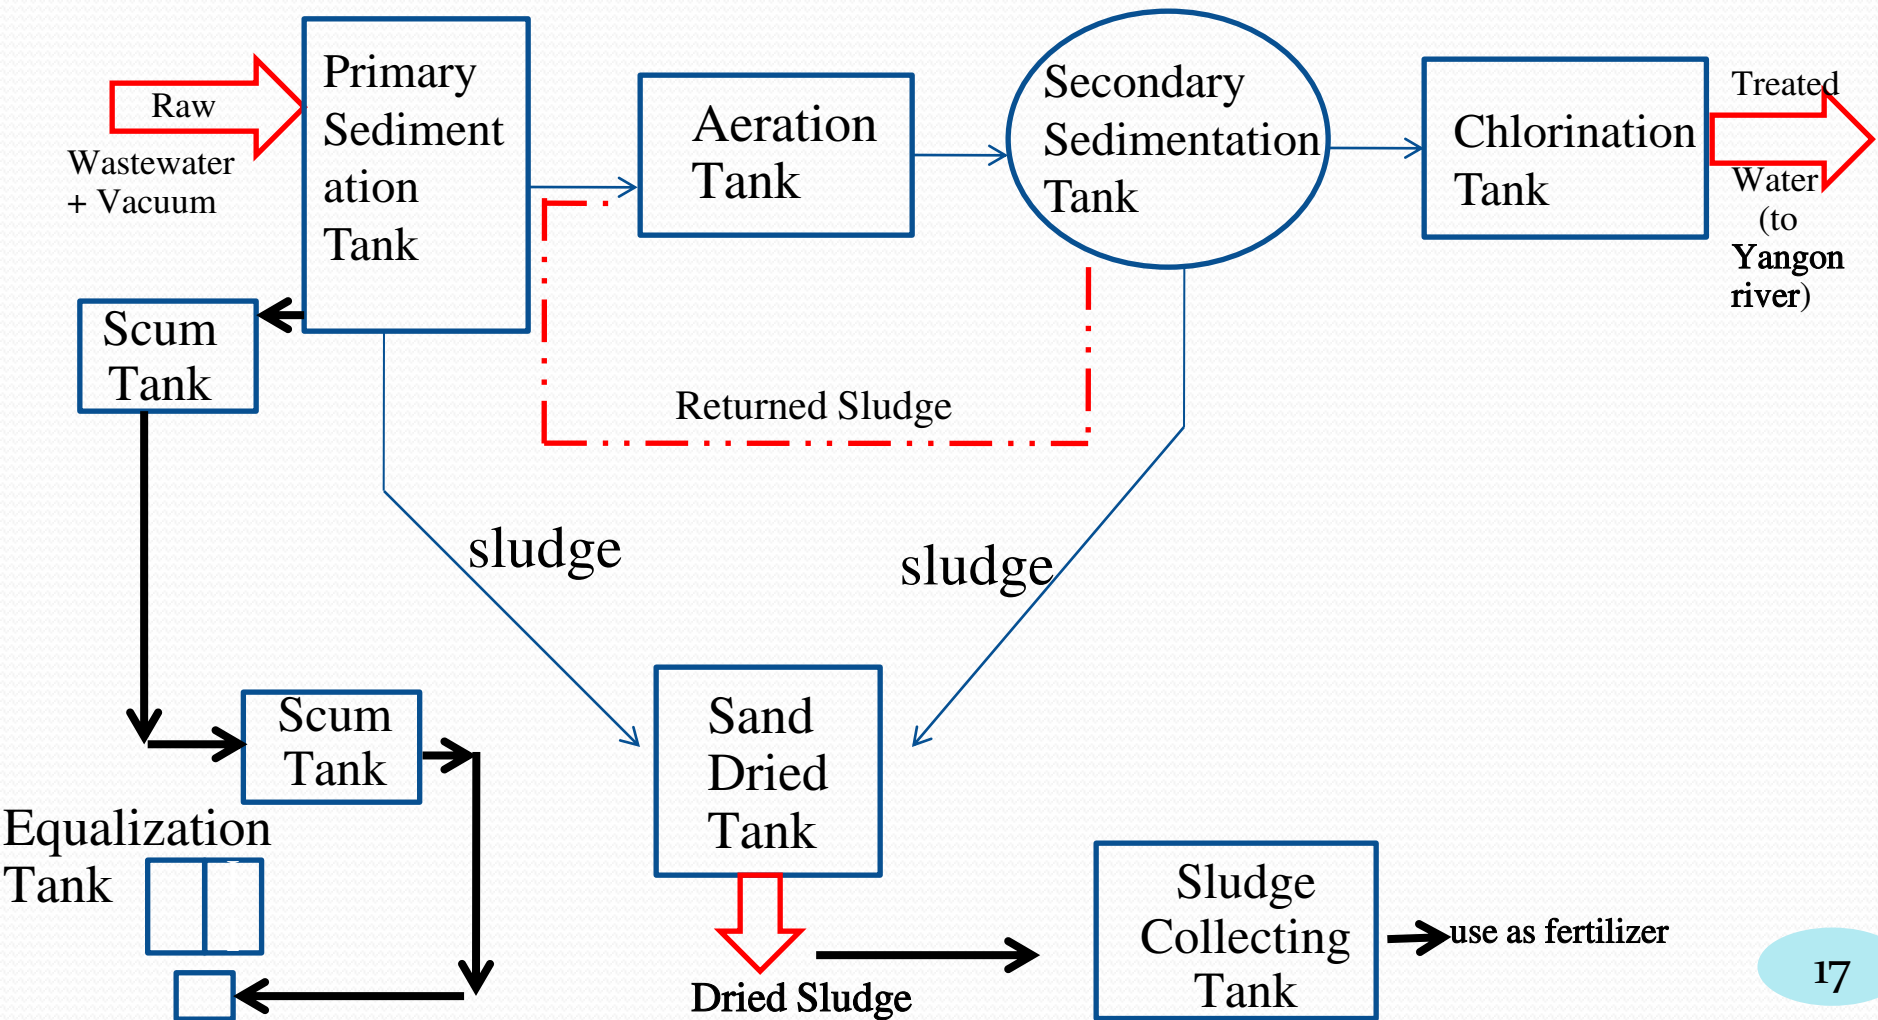

Programme for Sewage Treatment Project

- Detail Design
- Implementation
- Installation
- Commissioning
- Installation
- Training

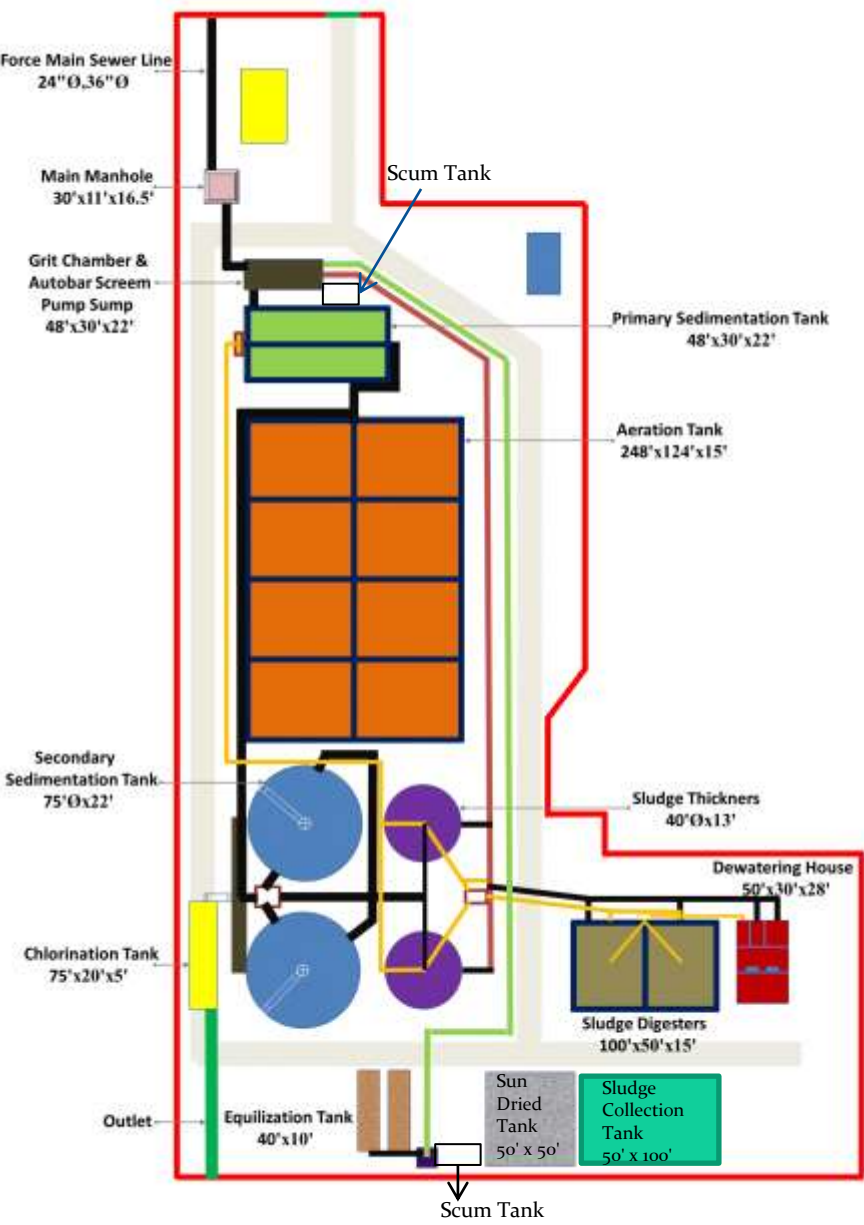

Design Criteria:

- Area of Plant - 5.56 acres
- Design population - 300,000
- Daily wastewater discharge-
 - 14775 m³/day
- BOD influent - 600mg / l
- BOD effluent - 20 mg / l
- Suspended solid influent- 700 mg / l
- Suspended solid effluent- 40 mg / l

Anaerobic Type

Aerobic Type

Laboratory and Sanitation

- Wastewater Condition
- Hazardous waste Condition
- Laboratory Measurement
- Onsite Measurement
- Measurement Parameters

Wastewater Treatment Laboratory

Hazardous waste Condition

Laboratory Measurement

Onsite Measurement

Measuring Parameter in Wastewater Treatment Laboratory & Onsite System

No	Parameter	Units
1	BOD (Biochemical Oxygen Demand)	mg/l
2	COD (Chemical Oxygen Demand	mg/l
3	TSS (Total Suspended Solid)	mg/l
4	SVI (Sludge Volume Index)	mg/l
5	DSVI (Dilute Sludge Volume Index)	mg/l
6	pH (Potential of Hydrogen Ion)	-
7	DO (Dissolved Oxygen)	mg/l
8	TDS (Total Dissolved Solid)	mg/l
9	Turbidity	NTU
10	MLSS (Mixed Liquor Suspended Solids)	ml
11	Oil & Grease	mg/l
12	Total Nitrogen	mg/l
13	Total Phosphate	mg/l

No	Parameter	Units	Remark
1	pH (Potential of Hydrogen Ion)	-	Probe
2	DO (Dissolved Oxygen)	mg/l	Probe
3	TDS (Total Dissolved Solid)	mg/l	Probe
4	Turbidity	NTU	-
5	COD (Chemical Oxygen Demand)	mg/l	Pack Test
6	NH ₄ (Ammonium)	mg/l	Pack Test
7	NO ₃ (Nitrate)	mg/l	Pack Test
8	NO ₂ (Nitrite)	mg/l	Pack Test
9	Transparency	ml/l	

Knowledge about Sanitation

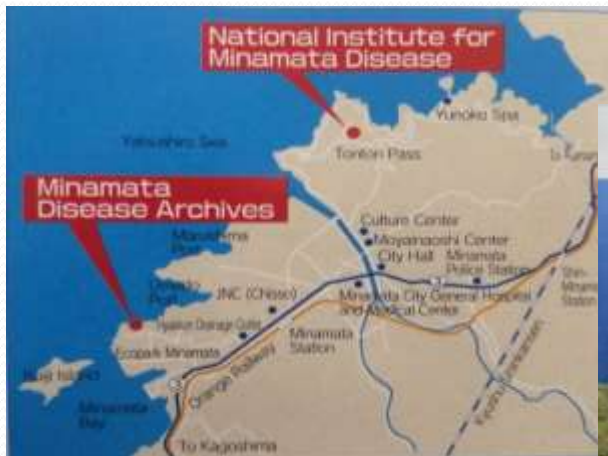

- Wastewater Nature
- Wastewater Depth
- Solid

Knowledge about Kitchen Waste

- Industry Effluent (eg – Minamata Disease – 1971)

Guideline for Wastewater Laboratory

**STANDARDS FOR DISCHARGE OF EFFLUENT
UNDER UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
(EPA) GUIDELINES**

No.	PARAMETER	MAX; PERMISSIBLE LIMITS
1	pH	6.0 to 8.0
2	Oil and Grease	10 mg/l
3	Phosphate(total)	10 mg/l
4	Phosphate (soluble)	5.0 mg/l
5	TDS	1200 mg/l
6	Temperature	20 to 35°C
7	Total Suspended Solids	100mg/l
8	Turbidity	300 NTU
9	Nitrogen total	20 mg/l
10	COD	100 mg/l
11	BOD ₅	50 mg/l

TDS – Total Dissolved Solids

COD – Chemical Oxygen Demand

BOD₅ – Biochemical Oxygen Demand

Location Plan of Sewerage System & Sewage Treatment Plants
